Independent Auditor's Report

To the Shareholder of British Caymanian Insurance Company Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of British Caymanian Insurance Company Limited (the Company), which comprise the statement of financial position as at December 31, 2024, and the statement of comprehensive income, statement of changes in shareholder's equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2024, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in the Cayman Islands, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and the Audit Committee for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

This report is made solely to the Audit Committee as a body. Our audit work has been undertaken so that we might state to the Audit Committee those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Audit Committee as a body, for our audit work, for this report, or for the opinions we have formed.

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernet + Young ktd.

Notes to Financial Statements

1. General

British Caymanian Insurance Company Limited (the Company), is incorporated in the Cayman Islands and operates as an insurance company. It was granted a Class A license under the Cayman Islands Insurance Act (Revised) on December 24, 1984.

The Company is a wholly owned subsidiary of British Caymanian Holdings Limited (the Parent), an entity domiciled in the Cayman Islands. The registered office and principal place of business of the Company and the Parent is BritCay House, P.O. Box 74, George Town, Grand Cayman, Cayman Islands, B.W. I.

The Company's parent is 75% owned by Coralisle Group Ltd. (The Group), an entity domiciled in Bermuda, whose principal activity is to act as a holding company. The Group is fully owned by Edmund Gibbons Limited (the Ultimate Parent), an entity domiciled in Bermuda.

The Company writes property and casualty insurance risks in the Cayman Islands.

The financial statements, including all notes, were authorized for issue by the Board of Directors on April 14, 2025.

2. Summary of Material Accounting Policies

Basis of Preparation

The preparation of Financial Statements in conformity with IFRS Accounting Standards (IFRS) requires management to make judgments, estimates and assumptions that affect the application of accounting policies, the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities as at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting periods. Actual results may differ from these estimates. The most significant estimation processes relate to assumptions used in measuring insurance and investment contract liabilities, assessing assets for impairment and fair valuation of certain invested assets. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future years affected.

Although some variability is inherent in these estimates, management believes that the amounts recorded are appropriate. The material accounting policies used and the most significant judgments made by management in applying these accounting policies in the preparation of these financial statements are summarized below.

The Company presents its Statement of Financial Position broadly in order of liquidity. The following balances are generally classified as current:

- cash and cash equivalents, financial assets, accounts receivable and accrued interest, other assets, amounts due from related companies, and reinsurance contract assets.
- other liabilities, amounts due to related companies, and insurance contract liabilities.

The following balances are generally classified as non-current:

• property, plant and equipment (including right-of-use assets) and intangible assets.

Basis of Measurement

The financial statements have been compiled on the going-concern basis and prepared on the historical cost basis, except for:

- financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income, which are stated at fair value.
- financial assets carried at amortised cost.
- Insurance contract liabilities and reinsurance contract assets are measured on a discounted risk adjusted basis in accordance with accepted actuarial practice (which in the absence of an active market provides a reasonable proxy for fair value).

Fair Value Measurement

Fair value is determined based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Fair value is measured using the assumptions that market participants would use when pricing an asset or liability. The Company determines fair value by using quoted prices in active markets for identical or similar assets or liabilities. When quoted prices in active markets are not available, fair value is determined using valuation techniques that maximise the use of observable inputs. When observable valuation inputs are not available, significant judgment is required to determine fair value by assessing the valuation techniques and valuation inputs. The use of alternative valuation techniques or valuation inputs may result in a different fair value.

The Company categorizes its fair value measurements according to a three-level hierarchy. The hierarchy prioritizes the inputs used by the Company's valuation techniques. A level is assigned to each fair value measurement based on the lowest level input significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined as follows:

Level 1 – Quoted (unadjusted) market prices in active markets for identical instruments. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Company is the current bid price. These investments are included in Level 1.

Level 2 – Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, inputs that are observable that are not prices (such as interest rates, credit risks, etc.) and inputs that are derived from or corroborated by observable market data. Most debt securities are classified within Level 2.

Level 3 – Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. These measurements include circumstances in which there is little, if any, market activity for the asset or liability. In making the assessment, the Company considers factors specific to the asset or liability and such an assessment will involve significant management judgment. Because of the inherent uncertainty in the valuation of these Level 3 investments, fair values of such investments may differ from the values that would have been used had a ready market for these investments existed, and the differences could be material.

Cash and Cash Equivalents

For the purposes of the Statement of Cash Flows, the Company considers all cash on hand, time deposits with an original maturity of three months or less and money market funds which can be redeemed without penalty, net of overdrafts as equivalent to cash.

Financial Assets

The Company has the following classifications for measurement of financial assets: (i) financial assets at fair value through profit or loss, (ii) financial assets held at amortised cost, and (iii) financial assets at fair value through other comprehensive income.

Initial Recognition and Measurement

Management determines the classification at initial recognition and it is dependent on the nature of the assets and the purpose for which the assets were acquired. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under IFRS 15, *Revenue from Contracts with Customers* ("IFRS 15").

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'Solely Payments of Principal and Interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent Measurement

Financial Assets Carried at Amortised Cost

The Company measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows.
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial Assets at Fair Value Through Profit or Loss

Financial assets at fair value through profit or loss (FVTPL) include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVTPL, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortised cost or at fair value through OCI, as described above, debt instruments may be designated at FVTPL on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the Statement of Financial Position at fair value with net changes in fair value recognised in the Statement of Comprehensive Income as a component of net investment income.

This category includes listed equity investments which the Company had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are also recognised as investment income in the Statement of Comprehensive Income when the right of payment has been established.

Impairment of Financial Assets

The Company assesses all debt instruments not held at fair value through profit or loss to determine if an allowance for expected credit losses (ECLs) is required. As the Company records all debt instruments at FVTPL, it has not created an allowance for ECL.

The Company has reviewed the ECL for the trade receivables that it is holding at amortised costs and determined that any ECL provision would be immaterial and therefore has not recorded any impairment provision in the results of the Company.

Financial Liabilities

All financial liabilities are recorded in the Statement of Financial Position at amortised cost using the effective interest method. Financial liabilities include accounts payable and accrued liabilities, included in other liabilities, which are all current liabilities. The carrying value of the Company's financial liabilities approximates their fair value.

Derecognition and modification of financial liabilities

The Company derecognises a financial liability when:

- its contractual obligations are discharged or cancelled, or expire; or
- its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in the Statement of Comprehensive Income or Loss.

Insurance and Investment Contracts

Insurance contracts are those contracts where the Company has accepted significant insurance risk from the policyholders by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. Contracts held by the Company under which it transfers significant insurance risk related to insurance contracts are classified as reinsurance contracts. Contracts under which the Company does not accept significant insurance risk are classified as either investment contracts or considered service contracts and are accounted for in accordance with IFRS 9 *Financial Instruments* or IFRS 15 *Revenue from Contracts with Customers*, respectively. The Company does not have such contracts at the moment.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its term, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire. Investment contracts can be reclassified as insurance contracts if insurance risk subsequently becomes significant. All references to insurance contracts in these accounting policies apply to insurance contracts issued or acquired, and reinsurance contracts held, unless specifically stated otherwise.

Level of Aggregation

The Company identifies portfolios of insurance contracts. The Company aggregates all insurance contracts issued into one portfolio and all reinsurance contracts held into one portfolio based on similar risk and are managed together. Each portfolio comprises contracts that are subject to similar risks and managed together, and is divided into three groups:

- Any contracts that are onerous on initial recognition;
- Any contracts that, on initial recognition, have no significant possibility of becoming onerous subsequently; and
- Any remaining contracts in the portfolio.

At this time, facts and circumstances do not indicate the possibility of any onerous contracts. Therefore, all contracts are classified in the remaining contracts group.

Each group of insurance contracts is further divided by year of issue. The resulting groups represent the level at which the recognition and measurement accounting policies are applied. The groups are established on initial recognition and their composition is not reassessed subsequently.

Contract Boundaries

The measurement of a group of contracts includes all of the future cash flows within the boundary of each contract in the group. Cash flows are within the boundary of a contract if they arise from substantive rights and obligations that exist during the reporting period under which the Company can compel the policyholder to pay premiums or has a substantive obligation to provide services.

- A substantive obligation to provide services ends when the Company has the practical ability to reassess the risks of the particular policyholder and can set a price or level of benefits that fully reflects those reassessed risks; or
- The Company has the practical ability to reassess the risks of the portfolio that contains the contract and can set a price or level of benefits that fully reflects the risks of that portfolio; and the pricing of the premiums for coverage up to the reassessment date does not take into account risks that relate to periods after the reassessment date.

The contract boundary is reassessed at each reporting date and, therefore, may change over time.

Summary of Measurement Models

Direct Contracts

Property and Casualty Contracts: The Company issues Property, Motor, Marine and Liability insurance. These contracts are accounted for under the Premium Allocation Approach ("PAA").

Reinsurance Contracts: Reinsurance contracts are accounted for under the Premium Allocation Approach.

Contract Separation

Embedded derivatives:

When an embedded derivative is not closely related to the host insurance contract, it should be accounted for applying IFRS 9 as if it was a standalone derivative and measured at FVTPL. Where IFRS 9 considers the embedded derivative as closely related to the host insurance contract then the embedded derivative is not separated and is accounted for applying IFRS 17 together with the host insurance contract. No clauses were identified by the Company in any contract which would indicate the presence of an embedded derivative requiring separation.

Investment components:

Distinct investment components are accounted for applying IFRS 9. In assessing whether an investment component is distinct, the Company considers whether the investment and insurance components are not highly interrelated and a contract with equivalent terms to the investment component is sold (or could be sold) separately in the same market or in the same jurisdiction by other entities (including entities issuing insurance contracts). No clauses were identified in the contracts which would indicate an obligation for the Company to repay a policyholder in all circumstances. Therefore, no investment components requiring separation were identified.

Distinct goods or Non-Insurance Services:

IFRS 17 paragraph 12 requires that any promise to transfer goods or non-insurance services to a policyholder must be unbundled from the host insurance contract by applying IFRS 15 Paragraph 7.

As with investment components and embedded derivatives, an assessment for the presence of goods and services will be required as each new treaty is issued under IFRS 17. Where goods and services are non-distinct (i.e. highly interrelated to the insurance component in the contract), they are not unbundled, and the entire contract is accounted for under IFRS 17.

Each of the insurance contracts underwritten and issued by the Company were reviewed for the inclusion of any distinct goods or services, which would require separation under paragraph 12 of IFRS 17. No clauses were identified in any contract which would indicate the presence of an embedded derivative requiring separation.

Initial Recognition & Measurement

Groups of insurance contracts issued are initially recognised from the earliest of the following:

- The beginning of the coverage period;
- The date when the first payment from the policyholder is due or received, if there is no due date; and
- When the Company determines that a group of contracts becomes onerous.

For insurance contracts issued, on initial recognition of each group of contracts, the carrying amount of the liability for remaining coverage is measured at the premiums received on initial recognition, less deferred acquisition costs.

Groups of reinsurance contracts issued are initially recognised from the earliest of the following:

• The beginning of the coverage period of the group of reinsurance contracts held. However, the Company delays the recognition of a group of reinsurance contracts held that provide proportionate coverage until the date when any underlying insurance contract is initially recognised, if that date is later than the beginning of the coverage period of the group of reinsurance contracts held; and

• The date an onerous group of underlying insurance contracts is recognised, if the Company entered into the related reinsurance contract held in the group of reinsurance contracts held at or before that date. For reinsurance contracts held, on initial recognition of each group of contracts, the carrying amount of the liability for remaining coverage is measured at the amount of ceded premium paid.

For reinsurance contracts held, on initial recognition of each group of contracts, the carrying amount of the liability for remaining coverage is measured at the amount of ceded premium paid.

Subsequent Measurement

For insurance contracts issued, subsequently, the carrying amount of the liability for remaining coverage is increased by any premiums received, and decreased by deferred acquisition costs and the amount recognised as insurance revenue for the coverage period.

For reinsurance contracts held, subsequently, the carrying amount of the liability for remaining coverage is increased by ceding premiums paid in the period and decreased by the amounts of ceding premiums recognised as reinsurance expenses for the services received in the period.

The Company does not adjust the liability for remaining coverage for insurance contracts issued and the remaining coverage for reinsurance contracts held for the effect of the time value of money and the effect of financial risk as the Company expects that the time between providing each part of the coverage and the related premium due date is not more than a year.

Insurance Acquisition Costs

Commission and other acquisition costs that vary with and are related to securing new contracts and renewing existing contracts are capitalised. All other costs such as allocated acquisition expenses and premium tax are recognised as expenses when incurred.

Onerous Contracts Initial Recognition Parameter

If at any time during the coverage period, facts and circumstances indicate that a group of contracts is onerous, then the Company recognises a loss in profit or loss and increase the liability for remaining coverage to the extent that the current estimates of the fulfillment cash flows that relate to remaining coverage (including the risk adjustment for non-financial risk) exceed the carrying amount of the liability for remaining coverage. The fulfillment cash flows are adjusted for the time value of money and the effect of financial risk if the liability for incurred claims is also adjusted for the time value of money and the effect of financial risk.

Liabilities for Incurred Claims

The Company employs a hybrid approach, including the Bornhuetter-Ferguson method with the Incurred (Paid) Loss Development method, to estimate liabilities for incurred claims. The Company recognises the liability for incurred claims of a group of insurance contracts at the amount of the fulfillment cash flows relating to incurred claims. The fulfillment cash flows are estimated using the input of assessment for individual cases reported to the Company and statistical analyses for the claims incurred but not reported, and include an explicit adjustment for non-financial risk (the risk adjustment). In addition, the fulfillment cash flows include internal loss adjustment expenses, which include estimated internal costs and other expenses that are expected to be incurred to finalize the settlement of the losses. The fulfillment cash flows are discounted unless the cash flows are expected to be paid in one year or less from the date the claims are incurred.

The discount rate is based on the risk free rate, plus an illiquidity premium. The Company has estimated the risk adjustment using a Cost of Capital approach. The risk adjustment is only applied to fulfillment cash flows related to past service.

The discount rates applied for discounting of future cash flows are listed below:

Discounting period	2024	2023
1 year	4.70 %	6.02 %
3 years	4.91 %	4.97 %
5 years	5.17 %	4.72 %

Derecognition and Contract Modification

The Company derecognises a contract when it is extinguished – i.e. when the specified obligations in the contract expire or are discharged or cancelled. The Company also derecognises a contract if its terms are modified in a way that would have changed the accounting for the contract significantly had the new terms always existed, in which case a new contract based on the modified terms is recognised. If a contract modification does not result in derecognition, then the Company treats the changes in cash flows caused by the modification as changes in estimates of fulfillment cash flows.

On the derecognition of a contract from within a group of contracts:

- the fulfillment cash flows allocated to the group are adjusted to eliminate those that relate to the rights and obligations derecognised;
- the number of coverage units for the expected remaining coverage is adjusted to reflect the coverage units derecognised from the group.

Salvage and Subrogation

Recoveries from salvage and subrogation are recorded as an offset to claims costs. Expected future subrogation recoveries are included in the liabilities for incurred claims.

Presentation

The Company does not disaggregate changes in the risk adjustment for non-financial risk between the insurance service result and insurance finance income or expenses. All changes in the risk adjustment for non-financial risk are included in the insurance service result.

The Company does not disaggregate insurance finance income or expenses between profit or loss and OCI. All insurance finance income or expenses are included in profit or loss.

The Company separately presents income or expenses from reinsurance contracts held from the expenses or income from insurance contracts issued, comprising of an allocation of reinsurance premiums paid and amounts recoverable from reinsurers.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost less accumulated depreciation and impairment losses. Depreciation is charged to expenses in the Statement of Comprehensive Income on a straight-line basis over the estimated useful life of the asset. The estimated useful lives are as follows:

Property	5 years
Leasehold improvements	5 - 15 years
Computer hardware	5 - 10 years
Motor vehicles	5 years

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Intangible Assets

Finite-life intangible assets are amortised on a straight-line basis over their useful life. The Company has classified software costs as intangible assets if they are not an integral part of the computer equipment. Finite-life intangible assets are recorded at cost less accumulated amortisation. Amortisation is provided for on a straight line basis over the following estimated useful lives.

Computer software	5-7 years
Portfolio acquisition cost	10 years

Impairment of Non-Financial Assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's fair value less costs of disposal and its value-in-use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value-in-use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses are recognised in the Statement of Comprehensive Income.

Impairment losses are reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Leases

The Company assesses, at contract inception, whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration, a lease is present. The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets. For the financial years ended December 31, 2024 and 2023, the Company did not have a lease agreement requiring the recognition of lease liabilities and right-of-use assets.

Short-Term Leases

The Company applies the short-term lease recognition exemption to its short-term leases of property (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases are recognised as expenses on a straight-line basis over the lease term.

Fees and Commission Income

Fees and commission income primarily represent fees earned from reinsurance commission income. Fees and commission income are recorded on an accrual basis when services are rendered.

Investment Income

Interest on cash and cash equivalents and debt securities are recorded on an accrual basis using the effective annual interest rate method. Dividend income is recognised when the right to receive the dividend is established.

Rental income from investment properties is reported in the Statement of Comprehensive Income or Loss linearly according to the term of the lease.

Defined Contribution Plan

Contributions to the defined contribution plan are recognised as an expense in net income or loss in the Statement of Comprehensive Income or Loss as incurred. A defined contribution plan is a pension plan under which the Company pays fixed contributions to a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient funds to pay all employees the benefits relating to employee service in current and prior periods.

Retiree Health Benefits

Company employees are part of the Coralisle Retirees Pension and Health Insurance benefits (Coralisle Plan) whereby, the retirees will be reimbursed by the Company for a portion or the entirety of their Medical Plan premiums if they meet certain criteria. This plan is sponsored by the Parent Company. There is no contractual agreement or stated policy with the Parent Company for charging the Company its share of net defined benefit cost and therefore, the portion of premium paid for the eligible retiree is included in expenses.

Provisions and Contingent Liabilities

The Company is, from time to time, involved in various claims, legal proceedings and complaints arising in the ordinary course of business. The Company, in conjunction with internal counsel, makes its best estimate of the likelihood or outcome of these actions and considers this in the Company's accrued liabilities based on information as of the date the financial statements are available to be issued. The Company does not disclose information usually required by IAS 37 on the grounds to not prejudice seriously the outcome of any litigation but does not believe that adverse decisions in any pending or threatened proceedings will have a material impact on the financial condition or future results of operations.

New Standards, Interpretations and Amendments to Published Standards

Future Changes in Accounting Policy and Disclosure

Certain new standards, interpretations, amendments, and improvements to existing standards were issued by the International Accounting Standards Board (IASB) or the IFRS Interpretations Committee (IFRIC) that are mandatory for annual reporting periods beginning on or after January 1, 2024. Several amendments and interpretations apply for the first time in 2024, but do not have an impact on the financial statements of the Company. The Company has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

The following tables summarize all new and future pronouncements issued by IASB in 2024.

New Pronouncements	Standard	Effective date	First time applied	Applicability
International Tax Reform - Pillar Two Model Rules - Amendments	IAS12	Dec 31, 2024	May 2023	Not applicable
Classification of Liabilities as Current or Non- current and Non-current Liabilities with Covenants - Amendments	IAS1	Jan 01, 2024	Dec 2024	Not applicable
Lease Liability in a Sale and Leaseback - Amendments	IFRS16	Jan 01, 2024	Dec 2024	Not applicable
Disclosures: Supplier Finance Arrangements - Amendments	IFRS7 & IAS7	Jan 01, 2024	Dec 2024	Not applicable

Future Pronouncements	Standard	Effective date	First time applied	Applicability
Lack of exchangeability - Amendments	IAS21	Jan 01, 2025	Dec 2025	Not applicable
Classification and Measurement of Financial Instruments - Amendments	IFRS9 & IFRS7	Jan 01, 2026	Dec 2026	Not applicable
Annual Improvements to IFRS Accounting Standards - Volume 11	Vol 11	Jan 01, 2026	Dec 2026	Not applicable
Presentation and Disclosure in Financial Statements	IFRS18	Jan 01, 2027	Dec 2027	Yes
Subsidiaries without Public Accountability	IFRS19	Jan 01, 2027	Dec 2027	Not applicable
Sale or Construction of Assets between an investor and its Associate or Joint Venture - Amendments	IFRS10 & IAS28	Date postponed		

Applicable New Accounting Standards

In 2024, the IASB issued IFRS 18 (Presentation and Disclosure in Financial Statements), which replaces IAS 1. While a number of sections have been brought forward from IAS 1 with limited changes, IFRS 18 introduces new requirements for presentation within the Statement of Comprehensive Income, including specified totals and subtotals. It also requires disclosure of management-defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes.

Narrow scope amendments have been made to IAS 7 Statement of Cash Flows and some requirements previously included within IAS 1 have been moved to IAS 8, which has been renamed IAS 8 Basis of Preparation of Financial Statements.

IFRS 18 and all consequential amendments are effective for reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Company has not adopted this change in standard for the year ended 2024, however plans to adopt this within the timeline mandated by the IASB.

3. Cash and cash equivalents

Cash and cash equivalents represent current accounts and demand deposits balances held as follows:

	2024	2023
	\$	\$
Unrelated banks in Cayman Islands	10,492	6,913
Unrelated banks in Switzerland		292
Unrelated banks in Bermuda	257	
	10,749	7,205

4. Financial assets

At the Statement of Financial Position date, financial assets are classified as follows:

	2024		2024 2023		3
	Carrying Value	Amortised Cost	Carrying Value	Amortised Cost	
	\$	\$	\$	\$	
At fair value through profit or loss	31,111	29,388	29,643	29,280	

For all securities, regardless of classification, the Company's largest concentration in any one investee, or group of investees, is 100% (2023 - 100%).

The investee, PIMCO, is a large asset management firm through which the Company holds a number of managed funds which encompass a diversified asset mix of equities, fixed income and alternative investments.

At Fair Value Through Profit or Loss (FVTPL)

	2024		2023	
	Value	Cost	Value	Cost
	\$	\$	\$	\$
Managed funds	31,111	29,388	29,643	29,280

The managed funds owned by the Company invest in a number of different types of investments which include: large cap, small cap and emerging market equity, sovereign bonds, investment grade corporate bonds, high yield bonds, asset backed securities, and alternative investments which can include private equity and real estate.

These investments are subject to the conditions and restrictions as further defined in the terms of the offering of each fund, which are usually contained in formal offering memoranda. Such offering memoranda generally define the nature and types of investments in which a managed fund can invest and provide for specified procedures regarding further investment in and redemption from the particular fund.

The investment portfolio is monitored by the Investment Committee and is subject to investment guidelines approved by the Board of Directors.

Fair Value Hierarchy

The following table presents the fair value hierarchy for the Company's financial assets as of December 31, 2024:

	Level 1	Level 2	Level 3	Total
Financial assets measured at fair value	\$	\$	\$	\$
Managed funds	25,317	—	5,794	31,111

The following table presents the fair value hierarchy for the Company's financial assets as of December 31, 2023:

	Level 1	Level 2	Level 3	Total
Financial assets measured at fair				
value	\$	\$	\$	\$
Managed funds	24,697		4,946	29,643

(a) Financial Assets in Level 1

The fair value of investments traded in active markets is based on quoted market prices at the statement of financial position date. Investments included in Level 1 comprise primarily domestic and foreign quoted equity shares and managed funds.

(b) Financial Assets in Level 2 and 3

The fair value of investments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates.

Specific valuation techniques include market standard valuation methodologies, which include discounted cash flow analysis, consensus pricing from various broker dealers that are typically the market makers, or other similar techniques. The assumptions and valuation inputs in applying these market standard valuation methodologies are determined primarily using observable market inputs, which include, but are not limited to, benchmark yields, reported trades of identical or similar instruments, broker-dealer quotes, issuer spreads, bid prices and reference data including market research publications. In limited circumstances, non-binding broker quotes are used. If all significant inputs required to determine the fair value of an investment are observable, the investment is included in Level 2.

Fair values of the Company's interests in unquoted managed fund investments are based upon the Net Asset Values of the underlying investment funds as reported by the investment managers or their independent administrators. The Company's ability to redeem its managed fund investments at the reported net asset value per share (or its equivalent) determines whether the managed fund investment is categorized within Level 2 or Level 3 of the fair value hierarchy. If the managed fund can be redeemed within a time period of 3 months with no gates or other redemption restrictions it is classified within Level 2. Otherwise, the managed fund is classified within Level 3.

There were no reclassifications of investments between Level 1, Level 2, or Level 3 during the year ended December 31, 2024 and 2023.

(c) Financial Assets in Level 3

The Level 3 financial assets are primarily composed of funds valued on a Net Asset Value (NAV) basis. The most significant input in the valuation is the NAV of the underlying fund. Generally, an increase in the NAV of each underlying fund will have an increase in the fair value of the financial assets.

The following table provides a summary of the changes in fair value of the Company's Level 3 financial assets for the year ended December 31, 2024:

	Managed Funds
	\$
Beginning balance as at January 1, 2024	4,947
Movement in unrealised gains	340
Purchases	526
Sales	(19)
Ending balance as at December 31, 2024	5,794
Total gains for the year included in income on Level 3 assets (recognized in investment income)	340

The following table provides a summary of the changes in fair value of the Company's Level 3 financial assets for the year ended December 31, 2023:

	Managed Funds
	\$
Beginning balance as at January 1, 2023	2,392
Movement in unrealised gains	603
Purchases	1,951
Ending balance as at December 31, 2023	4,946
Total gains for the year included in income on Level 3 assets (recognized in investment income)	603

A review of the fair value hierarchy classifications is conducted on an ongoing basis. Changes in the observability of valuation inputs may result in a reclassification for certain financial assets and liabilities. Reclassifications impacting Level 3 of the fair value hierarchy are reported as transfers in/out of the Level 3 category as of the beginning of the period in which the reclassifications occur.

Investment Income and Expense

Net investment income and expense comprises the following:

	2024	2023
	\$	\$
Dividend and interest income	121	43
Realised gain (loss) on sale of investments	29	(508)
Net unrealised gain on investments	1,354	2,788
Management fees	(11)	(8)
	1,493	2,315

5. Insurance Service and Finance Results

The following table presents an analysis of the insurance revenues and expenses recognised in the period.

	2024	2023
	\$	\$
Insurance contract revenue measured under PAA	81,634	60,274
Expenses from reinsurance contracts held		
Allocation of reinsurance premium paid	(52,986)	(38,854)
Claims recovered from the reinsurer	5,873	676
Adjustments to liabilities for incurred claims	464	373
	(46,649)	(37,805)
Expenses from insurance contracts held		
Incurred claims and other incurred insurance service expenses	(15,521)	(8,849)
Changes relating to past service - adjustment to liabilities for claims incurred	4,501	1,958
Insurance acquisition expenses	(12,376)	(8,853)
	(23,396)	(15,744)
Finance expenses from insurance contracts issued		
Interest accreted	(459)	(294)
Effect of changes in interest rates and other financial assumptions	115	(7)
	(344)	(301)
Finance income from reinsurance contracts issued		
Interest accreted	110	72
Effect of changes in interest rates and other financial assumptions	10	1
Encer of changes in interest rates and other infancial assumptions	10	73
Total insurance service and finance result	11,365	6,497

6. Insurance and Investment Results

The following table presents an analysis of the investment income and net insurance finance results recognised in the period.

roognised in the period.		
_	2024	2023

10. Intangible Assets

Intangible assets as at December 31, 2024, are detailed below:

	2023	Additions	Disposals	2024
Cost	\$	\$	\$	\$
Computer software	567			567
Portfolio acquisition cost	1,433	—		1,433
	2,000			2,000
	2022	A	ר יח	2024
	2023	Amortisation	Disposals	2024
Accumulated amortisation	<u> </u>	Amortisation \$	Disposais \$	<u>2024</u> \$
Accumulated amortisation Computer software			*	2024 \$ 567
	\$	\$	*	\$
Computer software	\$ 562	\$ 5	*	\$ 567
Computer software	\$ 562 1,289	\$ 5 144	*	\$ 567 1,433

Intangible assets as at December 31, 2023 are detailed below:

	2022	Additions	Disposals	2023
Cost	\$	\$	\$	\$
Computer software	567	—		567
Portfolio acquisition cost	1,433	—		1,433
	2,000	_	_	2,000
	2022	Amortisation	Disposals	2023
	2022	1 million cusacion	Disposais	2025
Accumulated amortisation	\$	\$	\$	\$
Accumulated amortisation Computer software			A	\$ 562
	\$	\$	A	\$
Computer software	\$ 540	\$ 22	A	\$ 562
Computer software	\$ 540 1,146	\$ 22 143	A	\$ 562 1,289

Until December 31, 2014, management considered the portfolio acquisition cost as having an indefinite useful life. Consequently, the asset was not amortised, but was tested annually for impairment. Due to a change in circumstances, effective January 1, 2015, management determined that the asset's useful life had changed from indefinite to finite.

Included in intangible assets are fully amortised assets of \$2,000 (2023 - \$523) which are still in use.

No impairment was recorded as of December 31, 2024 and 2023.

11. Property, Plant and Equipment

Property, plant and equipment as at December 31, 2024, comprises the following:

	2023	Additions	Disposals	2024
Cost	\$	\$	\$	\$
Leasehold improvements	444			444
Computer hardware	557		—	557
Furniture and office equipment	465	4	(346)	123
Motor vehicles	41			41
	1,507	4	(346)	1,165

	1,495	12		1,507
	2022	Depreciation	Disposals	2023
Accumulated depreciation	\$	\$	\$	\$
Leasehold improvements	424	4		428
Computer hardware	492	32		524
Furniture and office equipment	421	20		441
Motor vehicles	40	1		41
	1,377	57		1,434
Net book value	118			73

Included in property, plant and equipment are fully amortised assets of 1,037 (2023 - 1,318) which are still in use.

No impairment was recorded as of December 31, 2024 and 2023.

12. Risk Management and Financial Instruments

The activities of the Company involve the use of insurance contracts and financial instruments. As such, the Company is exposed to insurance risks and financial risks. This note presents information about the Company's exposure to each of the above risks, the objectives, policies and processes for measuring and managing risk and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company is also guided by the risk management framework of the Group. The Board has established an Investment Management Committee and Audit Committee, which along with the Group CEO and the Group Risk Oversight Committee are responsible for developing and monitoring the Company's risk management policies. The committees and Group CEO report regularly to the Board of Directors on their activities.

The risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Investment Management Committee, Risk Oversight Committee and Audit Committee of the Group are standing committees of the Board of Directors and assist the Board in fulfilling its oversight responsibilities relating to the financial reporting process, internal accounting and financial controls, audit and risk review process, risk assessment and risk management and compliance with legal and regulatory requirements. The Investment Management Committee, Risk Oversight Committee and Audit Committee meet at least four times per annum and report to the Board of Directors on their performance with regards to their respective terms of reference.

The principles used by the Company in managing its insurance risks are set out below.

Insurance Risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims is greater than estimated. Insurance events are random and the actual number and amount of claims will vary from year to year from the level established using statistical techniques.

Factors that aggravate insurance risk include lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered.

The Company insures the risks of individuals and companies located in Cayman Islands.

There is a concentration of industry risk which is managed through its underwriting strategy and reinsurance arrangements. The Company actively manages and pursues early settlements of claims to reduce its exposure to unpredictable developments.

The Company predominantly funds its net insurance liabilities (net of reinsurance recoveries) through its cash and in the normal course of its operations. In the event of a catastrophe, the net insurance liabilities may require funding through the disposal of the Company's portfolio of investments.

The mean duration of liabilities is calculated using historical claims data to determine the expected settlement pattern for claims arising from insurance contracts in force at the statement of financial position date (both incurred claims and future claims arising from the unexpired risks at the statement of financial position date).

The majority of the insurance risk to which the Company is exposed is of a short-tail nature, as policies generally cover a 12-month period. The duration of claims liability varies as presented below:

	2024	2023
Net short-term insurance liabilities – property risk	1 year, 2 months	10 months
Net short-term insurance liabilities – casualty risk	1 year, 2 months	1 year, 4 months

The Company provides coverage for motor vehicle, motor cycle, property, marine and general liability risks in Cayman Islands with the following per risk treaty limits:

	Treaty Limit Po millions of Cayn Dollar	nan Islands
	2024	2023
	\$	\$
Property	6	6
Motor liability	10	10
General liability	5	5
Marine	1	1
Engineering	11	9
Professional indemnity and directors & officers liability	2	2

Contract Risk

Insurance contract risk is the risk that a loss arises from the following reasons:

• Fluctuation in the timing, frequency and severity of claims relative to expectations;

- Inadequate reinsurance protection, and;
- Large unexpected losses arising from a single event such as a catastrophe.

Insured events can occur at any time during the coverage period and can generate losses of variable amounts. An objective of the Company is to ensure that sufficient claims liabilities are established to cover future insurance claim payments related to past insured events. The Company's success depends upon its ability to accurately assess the risk associated with the insurance contracts underwritten by the Company. The Company establishes claims liabilities to cover the estimated liability for the payment of all losses, including loss adjustment expenses incurred with respect to insurance contracts underwritten by the Company. Claims liabilities do not represent an exact calculation of the liability. Rather, claims liabilities are the Company's best estimates of its expected ultimate cost of resolution and administration of claims.

The composition of the Company's insurance risk, as well as the methods employed to mitigate risks, are described below.

Risk Related to the Timing, Frequency and Severity of Claims

Due to the occurrence of claims being unforeseeable, the Company is exposed to the risk that the number and the severity of claims would exceed the estimates.

Strict claim review policies are in place to assess all new and ongoing claims. Regular detailed reviews of claims handling procedures and frequent investigations of possible fraudulent claims reduce the Company's risk exposure. Furthermore, the Company enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that could negatively impact the business.

Catastrophe Risk

Catastrophe risk is the risk of occurrence of a catastrophe defined as any one claim, or group of claims related to a single event such as large fires, hurricanes or windstorms. Catastrophes can have a significant impact on the underwriting income of an insurer.

The Company has limited its exposure to catastrophe risk by imposing maximum claim amounts on certain contracts, as well as by using reinsurance arrangements. The Company purchases a combination of proportional and non-proportional reinsurance to manage catastrophe exposure. Retention limits for the excess of loss reinsurance vary by product line.

Reinsurance Protection

In the normal course of business, the Company limits the amount of loss on any one policy by reinsuring certain levels of risk with other insurers. Reinsurance ceded does not discharge the Company's liability as the primary insurer. In the event that the reinsurers are unable to meet their obligations under the reinsurance agreements, the Company would also be liable for the reinsured amount.

The Company reinsures its property risks under a property quota share treaty under the following terms:

	2024	2023
Property quota share	\$	\$
Limit per risk	6,000	6,000
Event limit	563,750	615,000
% ceded	80 %	73 %

In addition to the property quota share treaty, for any one risk event, there is a property per risk excess of loss treaty which further reduces the Company's net loss to \$315 (2023 - \$316).

For larger individual property risks the Company obtains the additional coverage by way of prearranged facilities and facultative reinsurance. The Company also purchases property catastrophe reinsurance. The coverage and cost is shared by all property and casualty companies in the Group. A company related through common control provides cover to reduce the treaty deductible from US\$12,760 (2023 - US\$10,000) on the first event and from US\$10,000 (2023 - US\$7,363) for the second event to the below:

	2024	2023
	US\$	US\$
First event - Per event exposures in excess of	3,000	3,000
Second event - Per event exposures in excess of	3,000	3,000
Limited to a maximum of	260,000	270,000
Optional third event - Limited to a maximum of	30,000	30,000

The third event cover provides reinsurance protection for losses impacting the layer US\$10,000 in excess of US\$10,000 and US\$30,000 in excess of US\$20,000.

The Company's motor and general liability exposure is limited through the purchase of excess of loss reinsurance which covers the maximum limits insured on any one risk in all jurisdictions.

	2024	2023
Motor	\$	\$
Loss limit per occurrence	1,000	750

Exposure to Insurance Risk

Key Assumptions

The principal assumption underlying the unpaid claim estimates is that the Company's future claims development will follow a similar pattern to past claims development experience. This includes assumptions in respect of average claim costs, claim handling costs, claim inflation factors and claim numbers for each accident year. Additional qualitative judgements are used to assess the extent to which past trends may not apply in the future, for example: one-off occurrence, changes in market factors such as public attitude to claiming, economic conditions as well as internal factors such as portfolio mix, policy conditions and claims handling procedures.

Judgment is further used to assess the extent to which external factors such as judicial decisions and government legislation affect the estimates. Other key circumstances affecting the reliability of assumptions include variation in interest rates and delays in settlement.

Sensitivities

The claims liabilities to certain assumptions are presented in the table below. It has not been possible to quantify the sensitivity of certain assumptions such as legislative changes or uncertainty in the estimation process. The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on profit before tax and equity. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non-linear.

Sensitivity Factor	Description of Sensitivity Factor Applied					
Average number of claims (frequency	er of claims (frequency) The impact of a change in number of claims by 10%					
Average claim costs (severity)	The impac	ct of a change in a	average claim cos	t by 10%		
	Number of Claims +10%	Number of Claims -10%	Claim Costs +10%	Claim Costs -10%		
		Increase (Decrease)			
	\$					
At December 31, 2024						
Impact on profit*	(819)	819	(819)	819		
Impact on shareholders' equity*	(819) 819 (819) 81					
*Net of reinsurance						

Financial Risk

The Company has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk

The nature and extent of the financial instruments outstanding at the Statement of Financial Position date and the risk management policies of the Company are discussed below:

Credit Risk

Credit risk is the risk that a counter-party to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. The Company's maximum credit risk exposure is the carrying value of assets less any provisions for irrecoverable amounts. The Company is exposed to credit risk in the following areas:

Cash and Investments

The Company maintains its cash and cash equivalents with financial institutions that management believes to be of high credit quality. Credit risk associated with these balances is managed by placing funds with banks and financial institutions that have strong credit ratings. The Company evaluates the creditworthiness of counterparties on an ongoing basis, considering factors such as financial strength, credit ratings, and market conditions. The Company monitors the financial stability of these institutions and does not anticipate any losses on such balances.

Investment asset allocation is determined by the Company's Investment Committee who manages the distribution of the assets to achieve the Company's investment objectives and to mitigate credit risks. Divergence from target asset allocations and the composition of the portfolio is monitored by the Company's Board of Directors and Investment Committee.

Geographical Concentration

The geographical concentration of financial assets at fair value through profit or loss is as follows:

	2024	2023
	\$	\$
Ireland	24,596	23,989
United States	6,515	5,654
Total	31,111	29,643

Insurance Balances Receivable

The Company's exposure to credit risk on its insurance balances receivable is influenced by the financial stability of entities and individuals that purchase insurance products. This credit risk is controlled by monitoring the aging of all amounts outstanding on an ongoing basis and monitoring the customers' financial health by reference to the media and discussions with the customers. A provision is made for non-recovery if considered necessary.

Collateral is not held against any of the outstanding balances; however the Company has the right to cancel the policy for non-payment. Based on the Company's current aging analysis, all premiums receivable over 30 days are considered to be past due but not impaired. Customer accounts that become past due over 60 days are placed on-hold and those that are over 90 days past due are considered for impairment by management. Cancellation or extension of the terms of the credit is considered on a case by case basis.

As at December 31, 2024, approximately 6,436 (2023 – 6,672) of insurance balances receivable due to the Company were from three major client groups, agents or brokers. Management is of the opinion that this concentration will not have a significant impact on the Company's financial condition.

Reinsurance Contract Assets

Reinsurance contracts do not relieve the Company from its obligations to policyholders. Failure of reinsurers to honor their obligations could result in losses to the Company; consequently, allowances are established for amounts deemed uncollectible. The Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities, or economic characteristics of its reinsurers to minimize the exposure to significant losses from reinsurer insolvencies.

With the exception of Coralisle Re Ltd., a related company, the Company reviews the creditworthiness of reinsurers on an annual basis and generally enters and maintains contracts with reinsurers that (1) have been rated as A- or higher by the AM Best credit rating agency and (2) have in excess of US\$500 million in capital and surplus. Current financial statements of the reinsurers are reviewed annually. Based on the individual reinsurance agreements, the Company may have the right to offset amounts due to reinsurers against any amounts due from reinsurers.

Amounts due from reinsurers are assessed regularly for any indication of impairment. At December 31, 2024, \$6,815 (2023 - \$3,449) was due from reinsurers who generally have an A.M. Best rating of at least A-. Management considers that there is no significant credit risk associated with any of the Company's reinsurers.

Related-Party Receivables

Amounts due from related parties are assessed and monitored for any indication of impairment. At December 31, 2024 and 2023, all amounts are considered collectible.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company is exposed to daily calls on its available cash resources for the payment of claims, policy benefits and operating expenses. In order to manage the Company's liquidity risk, management seeks to maintain levels of cash and short-term deposits sufficient to meet its liabilities when due, under normal and stressed conditions without incurring unacceptable losses or risking damage to the Company's reputation.

The following table summarizes the contractual recovery or settlement of other assets held (within 12 months from the Statement of Financial Position date) and the maturity profile of the Company's liabilities relating to financial instruments and insurance contracts:

	2024 2023							
	Within 1 Year	1-5 Years	5 Years and above	Total	Within 1 Year	1-5 Years	5 Years and above	Total
Financial assets	\$	\$	\$	\$	\$	\$	\$	\$
Cash and cash equivalents	10,749	_		10,749	7,205		_	7,205
Financial assets	31,111	—	—	31,111	29,643		—	29,643
Accounts receivable and accrued interest	_	_	_	_	10	_	_	10
Other assets	307	—		307	161		—	161
Amounts due from related companies	2,381	_	_	2,381	626	_	_	626
Reinsurance contract assets	24,960 69,508			24,960 69,508	18,135 55,780			18,135 55,780

		2024				2023		
	Within 1 Year	1-5 Years	5 Years and above	Total	Within 1 Year	1-5 Years	5 Years and above	Total
Financial liabilities	\$	\$	\$	\$	\$	\$	\$	\$
Other liabilities	643	_	—	643	502		—	502
Amounts due to related companies			_		1,315			1,315
Insurance contract liabilities	32,725	_	_	32,725	25,098	_	_	25,098
	33,368			33,368	26,915			26,915
Liquidity margin	36,140			36,140	28,865			28,865

Market Risk

Market risk is the risk that changes in market prices such as equity prices, interest rates and foreign exchange rates will affect the Company's income or the value of its holdings of financial instruments. The objective of the Company's market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Interest-Rate Risk

The Company invests in fixed interest debt securities, and managed funds, the fair values of which are affected by changes in interest rates. The coupon rates and maturity dates associated with the fixed interest debt securities held by the Company is disclosed in Note 4. Details of interest rate risk on related party balances are disclosed in Note 14.

	2024	2023
	\$	\$
Reinsurance contract assets	24,960	18,135
Insurance contract liabilities	32,725	25,098
Debt instruments at FVTPL	31,111	29,643
Total	88,796	72,876

		2024		2024 2023		3
			Increase (D	ecrease)		
	Change in interest rate	Profit before tax	I Equity	Profit before tax	Equity	
		\$	\$	\$	<u> </u>	
Reinsurance contract assets and insurance contract liabilities	+100bps	67	67	88	88	
Debt instruments	+100bps	(738)	(738)	(1,177)	1,177	
Reinsurance contract assets and insurance contract liabilities	-100bps	(69)	(69)	(92)	(92)	
Debt instruments	-100bps	738	738	(1,177)	1,177	

Foreign Currency Risk

The majority of the Company's financial assets and liabilities are denominated in Cayman Islands Dollars or US dollars. Given that the Cayman Islands dollar is pegged to the US dollar, the Company is not normally exposed to significant currency risk.

Equity Price Risk

The Company is subject to equity price risk due to daily changes in the market value of securities in its fund and equity portfolios. Equity price risk is actively managed in order to mitigate anticipated unfavorable market movements where this lies outside the risk appetite of the Company's Investment Committee. Diversified portfolios of assets are held in order to reduce exposure to individual equities. At the balance sheet date, management estimates that a 10% increase in prices for common equities and equity based managed funds held, with all other variables held constant, would increase net income by approximately \$1,047 (2023 - \$996). A 10% decrease in equity prices would have a corresponding decrease in net income.

Level 3 Sensitivity Analysis

At December 31, 2024, the Company classified assets at fair value on a recurring basis using Level 3 inputs (Note 4). Level 3 fair value measurements are based on valuation techniques that use at least one significant input that is unobservable. These measurements are made when there is limited, or any, market activity for the asset. The Company's investment manager uses a variety of inputs, some of which may be unobservable, to value these Level 3 assets. Any change in these inputs might result in a change to the fair value measurement.

Limitations of Sensitivity Analysis

The sensitivity information included in this note demonstrates the estimated impact of a change in a major input assumption while other assumptions remain unchanged. In reality, there are normally significant levels of correlation between the assumptions and other factors. It should also be noted that these sensitivities are non-linear and larger or smaller impacts should not be interpolated or extrapolated from these results. Furthermore, estimates of sensitivity may become less reliable in unusual market conditions such as instances when risk free interest rates fall towards zero.

13. Capital Management and Statutory Requirements

The Company's capital base is structured to exceed regulatory targets and desired capital ratios, provide flexibility to take advantage of growth opportunities and provide an adequate return to shareholders. The objective is to provide an appropriate level of risk management over capital adequacy risk, which is defined as the risk that capital is not or will not be sufficient to withstand adverse economic conditions, to maintain financial strength or to allow the Company to take advantage of opportunities for expansion.

The Cayman Islands Monetary Authority (CIMA) has statutory powers to use its discretion to require the Company to conduct its operations in accordance with general or specific conditions which may be imposed by CIMA or may be agreed between CIMA and the Company. The Company is required to maintain capital in excess of the greater of approximately \$375 and an amount of \$6,014 (2023 - \$5,306) based on a formula set out in local legislation. The formula prescribes minimum capital requirements for the Company's assets and liabilities based on the relative risk of the balances and also provides a margin for catastrophe. As at December 31, 2024, and December 31, 2023 the Company has met this requirement:

The Company's capital base consists of:

	2024	2023
	\$	\$
Authorized, issued and fully paid:		
Ordinary shares 3,000,000 at a par value of \$1.00 per share.	3,000	3,000
Contributed surplus	26,550	26,550
	29,550	29,550

14. Related-Party Transactions

Year-end Balances

The amounts due to and from companies related through common control are due on demand. As of December 31, 2024 and 2023, no provisions are held against amounts due from related parties.

	2024	2023
Due from (to) related parties	\$	\$
Coralisle Group Ltd. (The Group)	123	403
British Caymanian Insurance Agencies Limited (BCIA)	523	(1,315)
British Caymanian Holdings Limited (BCH)	93	206
Coralisle United Insurance Ltd. (United)	1,642	17
	2,381	(689)
Total due from related parties	2,381	626
Total due to related parties	_	(1,315)
	2,381	(689)

Balances with all other related parties are non-interest bearing.

Income and Expenses

The Group's subsidiaries insure the commercial and health risks of several related parties. These risks are written at standard commercial rates and are subject to the normal reinsurance protections of the Company. Below is the summary of income and expenses involving related parties:

	2024	2023
Income (expenses)	\$	\$
Insurance contract revenue (1)	4,261	3,730
Insurance service expense (1,3)	(917)	(709)
Reinsurance service expense (2)	(1,040)	(1,223)
Staff salaries and benefits (4)	(485)	(394)
Management fee expense (5)	(2,854)	(1,989)
Property	(445)	(445)
IT (6)	(1,073)	(59)
Insurance (7)	(127)	(117)
Other	(66)	(21)
	(2,746)	(1,227)

(1) The Company writes insurance for certain of its directors, key management and companies related through common control. These risks are written at standard commercial rates and are subject to the normal reinsurance protections of the Company.

(2) The Company purchases reinsurance to reduce the treaty deductible from a company related through common control.

(3) The Company uses the services of related companies in the settlement of its claims.

(4) The Company purchases pension and health insurance coverage for its employees from companies related through common control on normal commercial terms and conditions.

(5) The Company has an agreement with a company related through common control for the provision of functions and services necessary and incidental to the successful overall management of the Company. For the services provided, the Company is charged a fee.

(6) Included in computer expenses are fees paid to CG for use of their computer software and costs paid to companies under common control.

(7) The Company purchases insurance coverage from itself and a company related through common control.

Key Management Compensation

Compensation to key management employees deemed to be related parties under IAS 24 was as follows:

	2024	2023
	\$	\$
Short term employee benefits	307	282
Defined contribution pension and medical insurance	29	24
	336	306

15. Minimum Lease Commitments

The Parent's leases for office buildings expire at various dates between 2024 and 2026. Minimum annual lease and occupancy charge commitments as of December 31, 2024, are as follows:

	2024	2023
	\$	\$
Within 1 year	1,125	1,106
One to five years	494	1,542
	1,619	2,648

These future lease payments will be fully recharged between the Company and Britcay Agency depending on the applicable usage area per entity in any given year. For the year ending December 31, 2024, the lease payments were recharged between the Company and Britcay Agency at 45% and 55% respectively (2023 - 45% and 55% respectively).

16. Other Operating Expenses

	2024	2023
	\$	\$
Staff salaries and benefits	3,301	2,736
Property	208	208
Depreciation and amortisation	14	79
IT	1,033	786
Professional fees	354	448
Office	34	41
Travel	156	107
Finance charges	419	461
Other expenses	195	
Memberships & subscriptions	22	23
Communication	24	28
Total expenses	5,760	4,917

17. Change in Operating Working Capital

	2024	2023
	\$	\$
Decrease (increase) in:		
Accounts receivable and accrued interest	10	(10)
Reinsurance contract assets	(6,825)	(3,001)
Other assets	(146)	48
Increase (decrease) in:		
Insurance contract liabilities	7,627	4,940
Other liabilities	141	219
	807	2,196

18. Portfolio Transfer

On January 1, 2024, the Company acquired the Cayman portfolio of an entity under common control, CG United Insurance Ltd. (CGU), whereby the current policies and all claim liabilities were transferred to the Company at book value. Included in the transaction price was a consideration of \$100 to CGU for the book of business, and \$100 to the Company to assume the claim liabilities from CGU. Other assets necessary to facilitate the onboarding of clients were also transferred. The assets and liabilities transferred are listed below:

	2024
	<u> </u>
Assets	
Cash and equivalents	3,798
Reinsurance contract assets	510
Other receivables and prepaid expenses	122
	4,430
Liabilities	
Insurance contract liabilities	4,922
Accounts payable and accrued expenses	60
	4,982
Net Liabilities Transferred	552

The net liabilities transferred of \$552 was recorded as an amount receivable from CGU. The transfer of asset and liabilities did not result in a gain or loss for the Company.

19. Subsequent Events

The Company has completed its subsequent events evaluation for the period subsequent to the Statement of Financial Position through June 12, 2025, the date the financial statements were available to be issued.

Subsequent to year-end, the Company declared a dividend of \$3,280. An amount of \$2,460 was paid in the first quarter of 2025. The residual is outstanding.

There were no other subsequent events requiring disclosure or recognition in the audited financial statements.
